A dinner will follow the event
Usamah HADI graduated from the American University of Beirut and was granted his Doctorate in Medicine in 1980. He then spent four years at the same institute, completing a residency in Otolaryngology- Head and Neck Surgery. In 1992, he joined the Massachusetts Eye and Ear infirmary – Harvard Medical School in Boston where he had a fellowship training in endoscopic sinus surgery. He received the medical American Board Certification. In 1998 he became a Fellow of the American College of Surgeons.

In 2005, he was appointed as Head of the Department of Otolaryngology at the Beirut Governmental Hariri Hospital, Lebanon.

In addition, in 2007, he became a Clinical Professor at the Department of Otolaryngology-Head and Neck Surgery at the American University of Beirut Medical Center, Beirut, Lebanon.

In 2009, Dr. Hadi was elected as Vice President of the ENT Society in Lebanon and will the president of the society in May 2012.

He is a CHARTER member of the PAN ARAB RHINOLOGIC SOCIETY and is actively involved in its educational programs in the region. He is also involved in medical teaching at the AMERICAN UNIVERSITY OF BEIRUT MEDICAL CENTER.

Dr. Hadi has given the Functional Endoscopic Sinus Surgery Course, which includes hands on cadaver dissection, several times on the national and regional level.

He has published more than 50 articles in his specialty field and has given technical presentations and lectures at more than 30 international and national meetings, and has served as moderator at more than ten international conferences and numerous others in his home country and region.

His primary research interest is on allergic rhinosinusitis and diseases related to the nose. Other research includes study of pathogens and biofilm formation and disease in patient with chronic rhinosinusitis in collaboration with the microbiology department.

Dr. Hadi contributes to numerous charitable institutions, including Lions Club and human rights organizations, by providing medical care and services to needy people in Lebanon.

**Abstract**

Epistaxis is a common clinical problem ranging from minor bleeding to extensive, massive, and life threatening hemorrhage. The proper management depends on the type of pathology as well as the area from which the bleeding is occurring.

Various clinical diseases can compound this issue and render the diagnosis and management of this entity more complex and challenging.
A case illustrated review of the acute otitis media complications have been done, with emphasis on Lateral Sinus Thrombophlebitis and mastoiditis in the setting of cochlear implant.
